PROJECTS

- **Clothing Website (PT Sintesa Niaga Karya)**

Feb 2023 – Present

(Online) This website is the Sintesa Digital Clothing Management website from PT Sintesa Niaga Karya. It includes production management, ordering, payment features, and report management. I have a role in fixing bugs and adding features such as expense reports, cost of goods sold reports, cash on bank management, and debt management.

Link Website:

<https://clothing.sintesaniaga.com>

Skills: MySQL, Laravel, Tailwind CSS, Git

- **Employee Management System (PT Sintesa Niaga Karya)**

Feb 2023 – Aug 2024

(Online) A website that can record employee cash receipt in a company. I played a role in fixing bugs and adding features such as managing deduction of cash advances and generating reports.

Link Website:

<https://kepegawaian.sintesaniaga.com>

Skills: Vue.js, MySQL, Laravel, Tailwind CSS, Git

- **Printing Website (PT Sintesa Niaga Karya)**

Feb 2023 – Present

(Online) This website is the Sintesa Digital Printing Management website from PT Sintesa Niaga Karya. It includes production management, ordering, payment features, and report management. I have a role in fixing bugs and adding features such as cashier, expense reports, cost of goods sold reports, cash on bank management, and debt management.

Skills: MySQL, Laravel, Tailwind CSS, Git

- **Profile and Portfolio of Jokian.ku**

Jan 2023 - Present

(Online) Jokian.ku profile website. In this project, I play the role of a front end developer.

Link Website: <https://jokiankuu.github.io>

Skills: React js, Cascading Style Sheets (CSS), Git

- **WIDER Application (WIKI Digitalization Technique) Based on Website (2024)**

Oct 2023 – Jan 2024

(Online) Developed a web-based management and dashboard platform for Division 2 of PT Wijaya Karya (Persero) Tbk. The WIDER application streamlines operational processes by providing centralized data management, performance monitoring dashboards, and enhanced workflow automation. Designed a user-friendly interface using Bootstrap, ensured robust backend functionality with Laravel, and implemented a scalable MySQL database. Leveraged GitHub for efficient collaboration and version control, delivering a solution that improves decision-making and operational efficiency.
